MONTANA RELATIVE VALUE FEE SCHEDULE

for

Medical, Chiropractic and Paramedical Services

JANUARY, 1987

Insurance Compliance Bureau
Division of Workers' Compensation
Department of Labor and Industry
State of Montana

DIVISION OF WORKERS' COMPENSATION

TABLE OF CONTENTS

INTRODUCTION

Section 39-71-704, Montana Code Annotated provides a maximum fee schedule be adopted as a relative value fee schedule for medical, chropractic and paramedical services, with unit values to indicate the relative relationship within each grouping of specialties. Medical fees are based on the median fees as billed to the State Compensation Insurance Fund during the year preceding the adoption of the schedule. The fee schedule is established annually by the Division, effective in January of each year.

Relative unit values, instructions, definitions and explanations for most procedures are found in this and three other publications:

Official Medical Fee Schedule for Services Rendered Under the California Workers' Compensation Laws, (OMFS), California Workers' Compensation Institute.

Relative Value Guide, (ASA), American Society of Anesthesiologists, 1985 Edition.

1985 Health Care Procedure Coding Schedule, (HCPCS), U.S. Health Care Financing Administration.

HOW TO USE THE SCHEDULE

Insurers can determine the maximum amount payable by multiplying the procedure's relative unit value by the corresponding specialty area's conversion factor and rounding to the nearest hundredth. Insurers should NOT use a conversion factor from one specialty area to determine the maximum amount payable in another specialty area. For example, do not use the surgery conversion factor to determine the maximum fee for a medical procedure. Relative unit values for procedures can be found in either the Montana Relative Value Fee Schedule (MRVS), OMFS or ASA.

A Relative Unit Value (RUV) is now established for many services in OMFS indicated as "Relativity Not Established" (RNE) and for many new services. Further descriptions of such services may be found in the Physician's Current Procedural Terminology (CPT).

Services or procedures indicated in the OMFS as "By Report" (BR) or "Service" (SV) retain their designations. Anesthesia procedures indicated as "Individual Consideration" in ASA are defined by the Division as BR.

The Montana Relative Value Fee Schedule is divided into seven (7) specialty areas.

Medicine
Anesthesia
Surgery
Radiology - Professional Component
Radiology - Total
Pathology
Dental

Each specialty area is printed on separate color paper for ease of identification. Each specialty area is listed in ascending order. Each procedure has its procedure code identification, a short description and the procedure's relative unit value.

If the procedure is not listed in the MRVS, then consult the OMFS, HCPCS, or ASA to see if it is listed there. If the procedure is listed in the OMFS, then use its RUV. If a procedure does not exist in either the Montana Relative Value Fee Schedule, OMFS, ASA, or HCPCS, it may be a newly developed procedure or is not described properly.

Procedures listed as RNE should be paid on a case-by-case basis. Any new procedure created after the effective date of this publication and before the issuance of a new schedule should be treated as RNE.

A procedure listed as BR should be justified by the medical service provider since the procedure is too variable in nature of its performance to permit assignment of a RUV. Fees for such procedures need to be justified "by report." A DETAILED CLINICAL RECORD IS NOT NECESSARY.

A procedure listed as SV is not a single procedure, but rather a combination of several procedures listed in OMFS, ASA or MRVS. The SV procedures, although identified by a specific code number, can be described only in terms of several services included together. Therefore, a RUV is not indicated for SV procedures and the total RUV is derived from the relative unit values for each individual service performed. When a medical service provider utilizes a SV procedure, the medical service provider should describe in its billing which procedures make up the services rendered, by itemizing each individual service, listing the code number and the fee for each.

SPECIAL POINTS TO KNOW

Anesthesia procedure codes identified in OMFS are not to be used. The ASA procedure codes are to be used instead.

The following medicine procedure codes may be used only when appropriate skills and time warrant use of such procedures and must be accompanied by detailed examination and operative notes: 90015, 90020, 90026, 90060, 90070, 90080, 90085, 90220, 90230, 90270, 90610, 90620, 90625 and 90630.

For the surgery specialty group insurers must use the follow-up days in OMFS to determine acceptable levels of service after surgery as well as the surgical ground rules.

The American Dental Association codes correspond with the HCPCS codes.

OTHER POINTS OF INTEREST

Medical service providers are urged to use the appropriate accident number on their billings. Failure to do so may result in delay in payment from the insurer. Spaces are provided on all medical service provider forms for accident numbers.

Appendix A contains the Administrative Rules of Montana, Section 24.29.1420, adopted by the Division in accordance with the Workers' Compensation Act.

The current Division medical service provider forms are in Appendix B. Supplies of these forms can be requested by writing to the Insurance Compliance Bureau. Insurers and medical service providers should use the most current version of the Division forms.

The date of the version of the form is indicated in the lower left hand corner of the form along with its proper form identification number. Insurers and medical service providers may reproduce current versions of forms.

Appendix C tells how to order OMFS, ASA and HCPCS. Please note discount prices for various quantity breaks. Each publication must be prepaid.

Questions or comments concerning the Montana Relative Value Fee Schedule should be directed to the Insurance Compliance Bureau, 5 South Last Chance Gulch, Helena, Montana 59601.

CONVERSION FACTORS

Conversion factors to be effective January 1, 1987 and applied to the 1987 Montana Relative Value Fee Schedule for Medical, Chiropractic and Paramedical Services (MRVS) are as follows:

Medicine		$5.43
Anesthesia		$24.96
Surgery		$140.00
Radiology		
	Professional	$1.73
	Total	$10.25
Pathology		$1.33
Dental		$7.00

APPENDIX A

ADMINISTRATIVE RULES

24.29.1420 RELATIVE VALUE FEE SCHEDULE

(1) A relative value fee schedule for medical, chiropractic and paramedical services, excluding hospital services, shall be established annually by the division, and become effective in January of each year. The Montana Relative Value Fee Schedule may be referred to as MRVS. An insurer is not obligated to pay more than the maximum fee calculated from the schedule for the particular services rendered.

(2) The relative value fee schedule shall be established containing maximum fees for the following specialties:

(a) Medicine
(b) Anesthesia
(c) Surgery
(d) Radiology--Professional Component
(e) Radiology--Total
(f) Pathology
(g) Dental

(3) The Division adopts by reference, for the use of procedure codes and relative values contained therein, the following documents:

(a) The Official Medical Fee Schedule for Services Rendered under the California Workers' Compensation Laws, as existing as of December 31, 1985, hereafter referred to as OMFS, for use with the medicine, surgery, radiology--professional component, radiology-- total, and pathology groups. Copies of this document are available from the California Workers' Compensation Institute, 120 Montgomery Street, Suite 715, San Francisco, California, 94104, or from the Montana Division of Workers' Compensation, 5 South Last Chance Gulch, Helena, Montana, 59601.

(b) The Anesthesia section of the 1985 edition of the Relative Value Guide, hereafter referred to as ASA, published by the American Society of Anesthesiologists, for use with the Anesthesia group. Copies of this document may be obtained from the American Society of Anesthesiologists, 515 Busse Highway, Park Ridge, Illinois, 60068, or the Montana Division of Workers' Compensation, 5 South Last Chance Gulch, Helena, Montana, 59601.

(c) The dental code section of the 1985 Health Care Procedure Coding Schedule, hereafter referred to as HCPCS, published by the Health Care Financing Administration of the U. S. Department of Health & Human Services for use with the dental group. Copies of this document (Doc. No. 01-060-00168-2) are available from the Superintendent of Documents, U. S. Government Printing Office, 941 North Capitol Street, Washington, D.C. 20401, or the Montana

Division of Workers' Compensation, 5 South Last Chance Gulch, Helena, Montana, 59601.

(4) The conversion factor of the fee schedule and relative values not established in the documents adopted by reference in (3) shall be based on the median fees billed to the State Compensation Insurance Fund during the year preceding the adoption of the schedule and calculated by the following means:

(a) The general method for determining the median of billed medical fees shall be:

(i) determine the procedure within each specialty group with the most billings.

(ii) determine if the procedure with the most billings meets statistical validity tests.

(iii) calculate the median value for the procedure.

(b) A 95 percent level of confidence will be maintained in computing each relative unit value or determinant of relativity.

(c) Analysis will not be conducted on a specialty group having less than four procedures or on a procedure having less than four billings. If a specialty group has less than four procedures, it will be grouped with another compatible specialty group. If another compatible group is not determined, the specialty group will be published as "Relativity Not Established" (RNE).

(d) The manipulation or imputation of data for any specific procedure will be permitted when statistically valid.

(5) Unless otherwise provided herein, insurers shall use instructions, definitions, and explanations contained in the OMFS, ASA or HCPCS when determining procedures for payment of fees.

(a) The maximum fee is calculated by multiplying the procedure's relative unit value by the procedure group's conversion factor. A conversion factor applicable to one procedure group is not applicable to any other procedure group (i.e., a surgical conversion factor cannot be used with a procedure in the medical group).

(b) Procedures listed in the division fee schedule as "Relativity Not Established" (RNE) or newly developed procedures for which the division has not established a relative unit value will be paid on a case-by-case basis.

(c) The value of procedures whose relativity is identified as "By Report" (BR) or "Individual Consideration" (IC) will be determined individually upon billing because the service is too unusual or variable to be assigned a standard unit value.

(d) Bills for procedures whose relativity is identified as "Service" (SV) must designate the specific procedures included therein.

(e) Chiropractic procedures listed in OMFS should be limited to the following codes: 90000, 90010, 90040, 97000, 97050, 72040, 72050, 72052, 72070, 72100, 72110, 72114, 72220, 73000, 73010, 73020, 73060, 73070, 73100, 73120, 73500, 73550, 73560 and 73590.

(f) The following medicine group procedure codes may be used only when appropriate skills and time warrant use of such procedures and billings for such procedures must be accompanied by detailed examination and operative notes: 90015, 90020, 90026, 90060, 90070, 90080, 90085, 90220, 90230, 90270, 90610, 90620, 90625, and 90630.

(g) Follow-up days in OMFS for the surgery group must be used when determining acceptable levels of service after surgery. (History: Secs. 39-71-203 and 39-71-704 MCA, as amended by section 3 of Ch. 422 of Laws of 1985; IMP, Sec. 39-71-704 MCA, as amended by section 2 of Ch. 422 of Laws of 1985; NEW, 1986 MAR p. 458, Eff. 4/1/86.)

Sub-chapters 15 through 19 reserved.
